

OREGO-STIM®

A Meriden Animal Health Product

OREGO-STIM®: THE PHYTOBIOTIC FOR SUPERIOR GUT MANAGEMENT

Orego-Stim® is the 100% natural feed additive/flavour for use in poultry diets and drinking water. *Orego-Stim*® not only enhances gut function, but is also renowned for its other interesting properties.

Orego-Stim® reduces the amounts of pathogenic bacteria in the intestines, allowing for optimal growth of intestinal villi. This provides a greater surface area for better absorption of nutrients, leading to better growth rates, improved FCR and reduced feed costs.

Orego-Stim® also maintains a healthy gut flora. Continuous use of *Orego-Stim*® ensures that pathogenic bacteria are kept at the lowest possible levels, while preserving healthy levels of beneficial bacteria in the intestines.

Field trials from various countries have proven that incorporating *Orego-Stim*® in poultry diets, regardless of the different health status of farms, can combat the negative effects of coccidiosis while preventing other gastrointestinal tract diseases and the imperative need for coccidiostats and regular antibiotic therapy.

Wet droppings are a common problem that frequently calls for the unnecessary use of antibiotics. *Orego-Stim*® reduces the frequency of wet droppings and keeps mortality low without the need for extra medication.

Orego-Stim® serves as a natural growth enhancer, improving growth rates and health status of poultry, leading to increased profits for the producer.
